

# Payment Fraud Statistics - Summary of Results Fraud Perpetrated on Australian Cheques and Cards

### 1 January 2014 - 31 December 2014 (Revised December 2015)

	Fraud Transactions		Total Transactions		Fraud Rates	
	number	\$	number (millions)	\$ (millions)	as % of total no. of transactions	as % of total value (\$) of transactions
Cheques	1,029	\$6,476,261	167	\$1,228,512 r	0.0006%	0.0005%
Australian-issued cards	1,733,821 r	\$386,467,988 r	6,670	\$657,206	0.0260%	0.0588%
- Proprietary debit cards	70,697	\$22,928,869	N/A	N/A	N/A	N/A
<ul> <li>Scheme credit, debit and charge cards</li> </ul>	1,663,124	\$363,539,119	N/A	N/A	N/A	N/A
Total	1,734,850	\$392,944,249	6,836	\$1,885,718	0.0254%	0.0208%

#### Note:

1. Data for the total number and total value of all transactions is from the RBA's Payment Data. The data for cheques is sourced from Table C6 and for cards from Tables C1, C4 and C5.

2. A break in the series occurred at the end of 2012 as a result of a change in the data available in Table C5. The RBA no longer publishes debit card data by card types but provides aggregated data for all cards. Therefore APCA is no longer able to calculate fraud rates for proprietary debit cards and scheme credit, debit and charge cards separately.

3. For cards the number of fraud transactions does not represent the number of cards or consumers affected. Typically, multiple fraud transactions are made on a single card.

r = Figures have been revised.

## **Cheque Fraud Perpetrated in Australia**

### 1 January 2014 - 31 December 2014

		Actual		Exposure		Receoveries *
Category		Transactions	Value (\$)	Transactions	Value (\$)	Value (\$)
On-Us Fraud	Valueless	44	875,466	536	28,366,572	278,070

	On-Us Total	1,000	6,303,734	2,325	55,933,703	1,034,022
	Valueless	18	108,900	320	109,911,691	354,580
	Valueless - Kite Flying	10	24,850	132	38,249,470	89,264
	Third Party Conversion	1	38,777	24	368,409	600
	Deposit Total	29	172,527	476	148,529,570	444,444
Total		1,029	6,476,261	2,801	204,463,273	1,478,466

\* Data on the 'transactions' of recoveries is not collected.

"Actual" losses can relate to "Exposure" during an earlier period. This explains why, in some reporting periods, actual losses may exceed exposure.

### **Explanation of Cheque Fraud Categories**

#### **On-us Fraud**

On-us cheque fraud includes cheques issued by Financial Institution X and deposited back into Financial Institution X. Categories for On-Us Fraud include:

• Valueless - Covers cheques drawn on an account where there appears to be suspicious circumstances or where it is thought that the Cheque is stolen or forged or in any other way is fraudulently issued and action is taken in terms of Rule 4.4 in Schedule 10.

#### • Fraudulently Altered Cheques :

• Payee Only - cheques that have been altered to show payee details other than those originally authorized by the drawer and where no other area of the cheque has been altered.

• Amount Only - cheques that have been altered to show \$-amount details other than those originally authorized by the drawer and where no other area of the cheque has been altered.

• Both Payee AND Amount - Cheques that have been altered to show payee details AND \$-amount details other than those originally authorized by the drawer and where no other area of the cheque has been altered.

Note: Fraudulently altered cheques do not include cheques with forged signatures. These are included in Stolen Blank Cheque/Book and Originated or Non-Originated Counterfeit Cheques.

Where alterations are made to the MICR line, items are included in the counterfeit category

• Stolen Blank Cheque/Book - this includes original stolen blank cheques that are written or marked in order to be passed off as if by the legitimate signatory. Includes forged makers mark.

• Originated Counterfeit Cheques - originated counterfeit cheques are produced using the paper of the original cheque to create a new, unauthorized cheque. Techniques used in this process include washing, laser printing, scanning and desk-top publishing.

• Non-originated Counterfeit Cheques - non-originated counterfeit cheques made on new paper to create a new, unauthorized cheque. Techniques used in this process include laser printing, photocopying, scanning and desk-top publishing. This category also includes items where the MICR line has been altered.

• Breach of Mandate – this involves payment of cheques which do not follow the original instructions or arrangements set up. That is, the cheque may require two signatories but the financial institution, through error, allows only one signatory. Other examples include a cheque drawn by a designated authority such as Financial Officer or Accountant and used for fraudulent purposes.

#### Deposit Fraud

• Valueless - Covers cheques deposited to an account knowing that these cheques should not be honoured on presentation by the drawee financial institution as they are valueless (lack of funds), counterfeit, reported stolen, have been fraudulently altered or are in breach of mandate (e.g. do not contain required number of signatures).

Note: This category excludes customer cheques dishonoured or returned for lack of funds where cheques were drawn in error, that is, there was no intent to defraud.

• Valueless: Kite Flying - the activity of depositing valueless cheques and making withdrawals against those valueless cheques, between accounts owned by the same person. Also called round robin transactions.

• Third Party Conversion - this category includes unaltered cheques which have been deposited to an account other than the payee. This arises where the financial institution has made insufficient enquiry or verification of the depositor regarding their title to the cheque. It also includes cheques where there are two payees but the financial institution has allowed one payee to deposit the amount into their personal account without authority from the other payee.

Catego	Transactions	Value (\$)

## Proprietary Debit Cards Fraud Perpetrated in Australia

1 January 2014 - 31 December 2014

**Note:** For fraudulent transactions initiated at ATMs, POS terminals and other devices, the above statistics incorporate all transactions where either "cheque" or "savings" was selected, regardless of the type of card used (that is debit card, 'combo' card, scheme card etc). The number of fraud transactions does not represent the number

### Explanation of Proprietary Debit Cards Fraud Categories

• Lost/Stolen - fraud resulting from the loss or theft of an existing card and a fraudulent transaction has taken place.

of cards or consumers affected. Typically, multiple fraud transactions are made on a single card.

• Card Never Received - fraud where a card has been intercepted (stolen) during delivery to the customer and used before it was received by the customer.

• Counterfeit/Skimming - the use of altered or illegally reproduced cards including the replication/alteration of the magnetic stripe and/or changes to the details on the face of the card with intent to defraud Skimming is a form of magnetic-stripe counterfeiting in which criminals are able to copy magnetic stripe track information (including Card Verification Value - CVV) from a valid card. Information is then encoded on a counterfeit or stolen card and then used fraudulently.

• Other - fraud that cannot be categorized under any of the other fraud type categories. This includes identity takeover and false applications etc.

### Scheme Credit, Debit and Charge Cards Fraud Perpetrated in Australia and Overseas on Australia-issued Cards

#### 1 January 2014 - 31 December 2014 (Revised December 2015)

### Fraud Perpetrated in Australia on Cards Issued Overseas

Category	Transactions	Value (\$)
Lost / Stolen	12,380	2,767,510
Never Received	263	31,524
Fraudulent Application	312	79,382
Counterfeit / Skimming	62,119	9,255,301
Card Not Present (CNP)	140,124	44,750,673
Other	1,808	494,327
Total	217,006	57,378,718

**Note:** The number of fraud transactions does not represent the number of cards or consumers affected. Typically, multiple fraud transactions are made on a single card.

#### Explanation of Scheme Credit, Debit and Charge Cards Fraud Categories

- Lost/Stolen Card fraud resulting from the loss or theft of an existing card and a transaction has taken place without the cardholder's consent or authority.
- Card Never Received fraud where a card has been intercepted (stolen) during delivery to the customer and used before it was received by the customer.
- Fraudulent Application fraudulent applications are applications for card accounts using a fictitious identity, using someone else's identity or providing false information during the application process.
- Counterfeit/Skimming the use of altered or illegally reproduced cards including the replication/alteration of the magnetic stripe and changes to the details on the face of the card with intent to defraud. Skimming is a form of magnetic stripe counterfeiting in which criminals are able to copy magnetic stripe track information (including Card Verification Value CVV) from a valid card. Information is then encoded on a counterfeit or stolen card and used fraudulently.
- Card Not Present (CNP) the use of account information including pseudo account information without the physical card being involved, via the phone, mail, Internet etc. without the authority of the cardholder. This category also includes fraud where a card should normally be present (eg: in a retail transaction) but a merchant has chosen to accept the transaction based on a card number only and it turns out to be a fraudulent transaction.
- Other fraud that cannot be categorised under any of the other Fraud Type categories. For example fraud using imprints of cards at merchants, or use of an existing account without the authority of the cardholder by a person who gains access to and use of the account through an unauthorized means, such as a fraudulent change of address or request for re-issuance of cards (but not lost or stolen cards).
